About me

I'm a 25 years old Fullstack developer with two years of experience in the area. Passionate about my job, I use modern technologies and frameworks such as React.js, Next.js, Node.js, Typescript, and many more to design innovative solutions. I ensure durable and scalable solutions in my work by implementing agile, DevOps and clean code techniques. Autonomous, organized and motivated by technical challenges, I invest myself fully in every project.

I am always looking for a new opportunity to grow and develop my skills!

Experience

Freelance
Lille, France - Remote

FREELANCE FULLSTACK DEVELOPER — *September 2023 - Today*

- Creation of modern web applications using React, Next.js, Astro, Svelte, Typescript, TailwindCSS, ...
- Back-end development with Node.js, DB (SQL and noSQL).
- In collaboration with customers, I listen to their specific needs, to meet them as best I can.
- Technical support to guarantee product quality.
- Technology watch to keep abreast of the latest frameworks and technologies.

Ex-nihilo.agency - Freelance
